

并置的方法视角 / Perspectives in conversation

目前实际有哪些可用视角？ / Which perspectives are actually available?

占星 / Astrology

八字 / BaZi

PHI 构型 / PHI
Configuration

数字学 / Numerology

紫微斗数 / Zi Wei

不同方法提供不同类型且有边界的主张，保留互补视角，不合并成单一方法结论。 / Customer-publishable claims from BZR, ECR, NUM, ZWR contribute different bounded claim types to the Direction dimension. They are retained as complementary perspectives rather than merged into one method conclusion.

方法覆盖不是投票、匹配百分比或相互证明。

证据矩阵 / The evidence matrix

现有跨方法读取为各维度保留什么关系？ / What relationship did the existing cross owner assign?

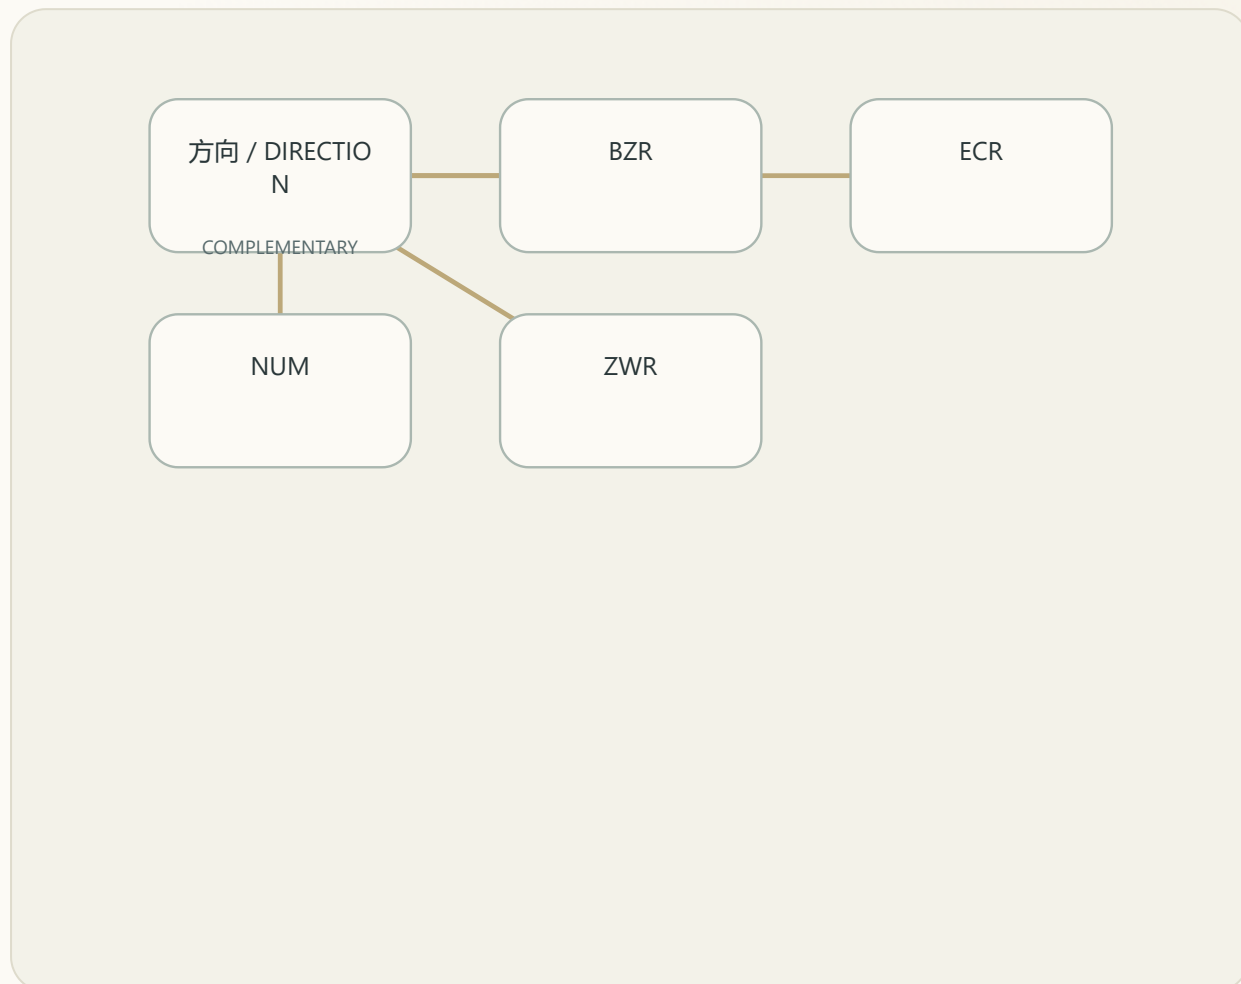

证据矩阵 / The evidence matrix

现有跨方法读取为各维度保留什么关系？ / What relationship did the existing cross owner assign?

方向 / DIRECTION

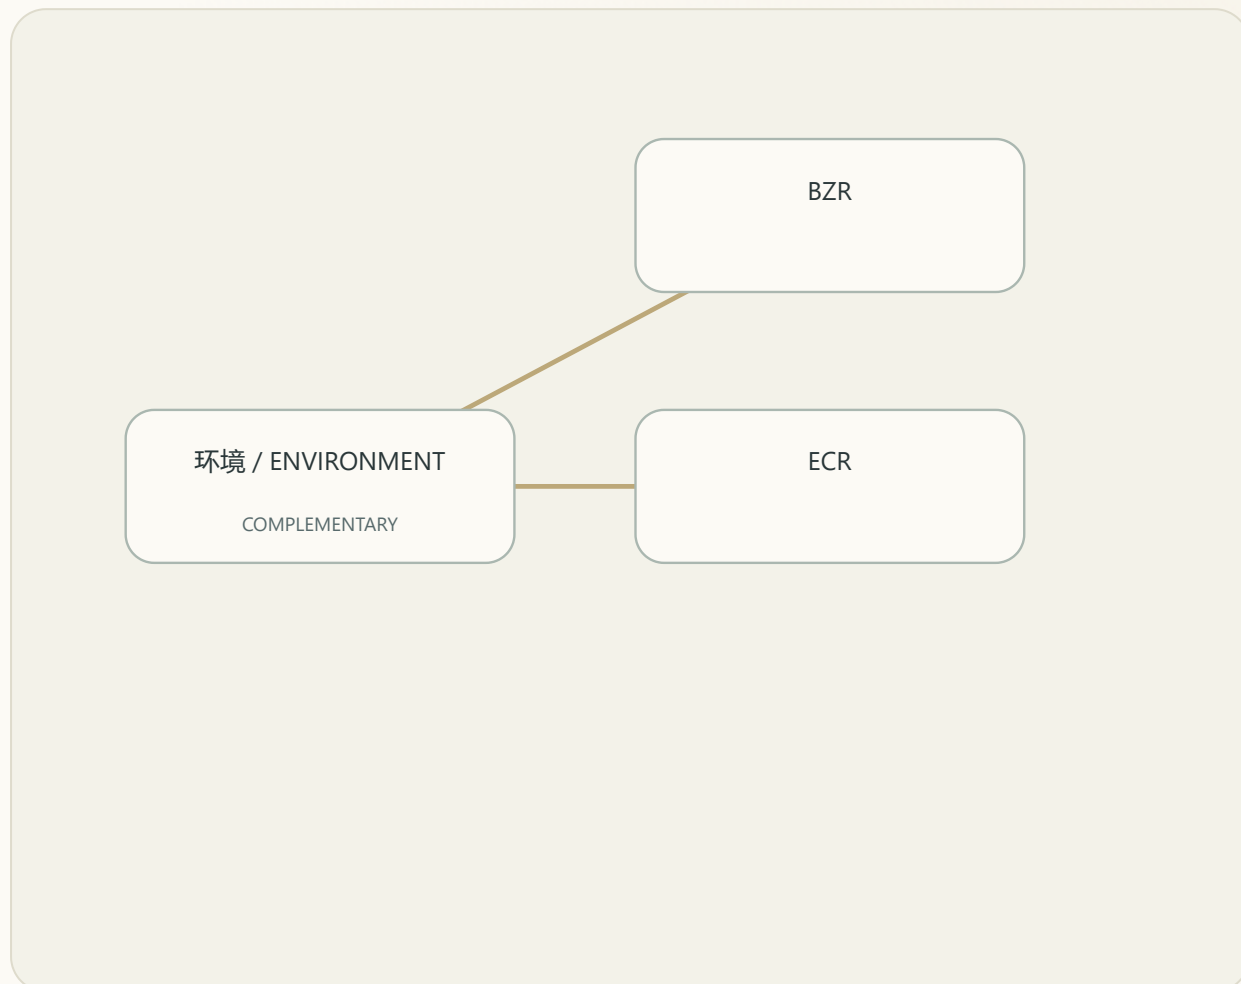

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

不同方法提供不同类型且有边界的主张，保留互补视角，不合并成单一方法结论。 / Customer-publishable claims from BZR, ECR, NUM, ZWR contribute different bounded claim types to the Direction dimension. They are retained as complementary perspectives rather than merged into one method conclusion.

环境 / ENVIRONMENT

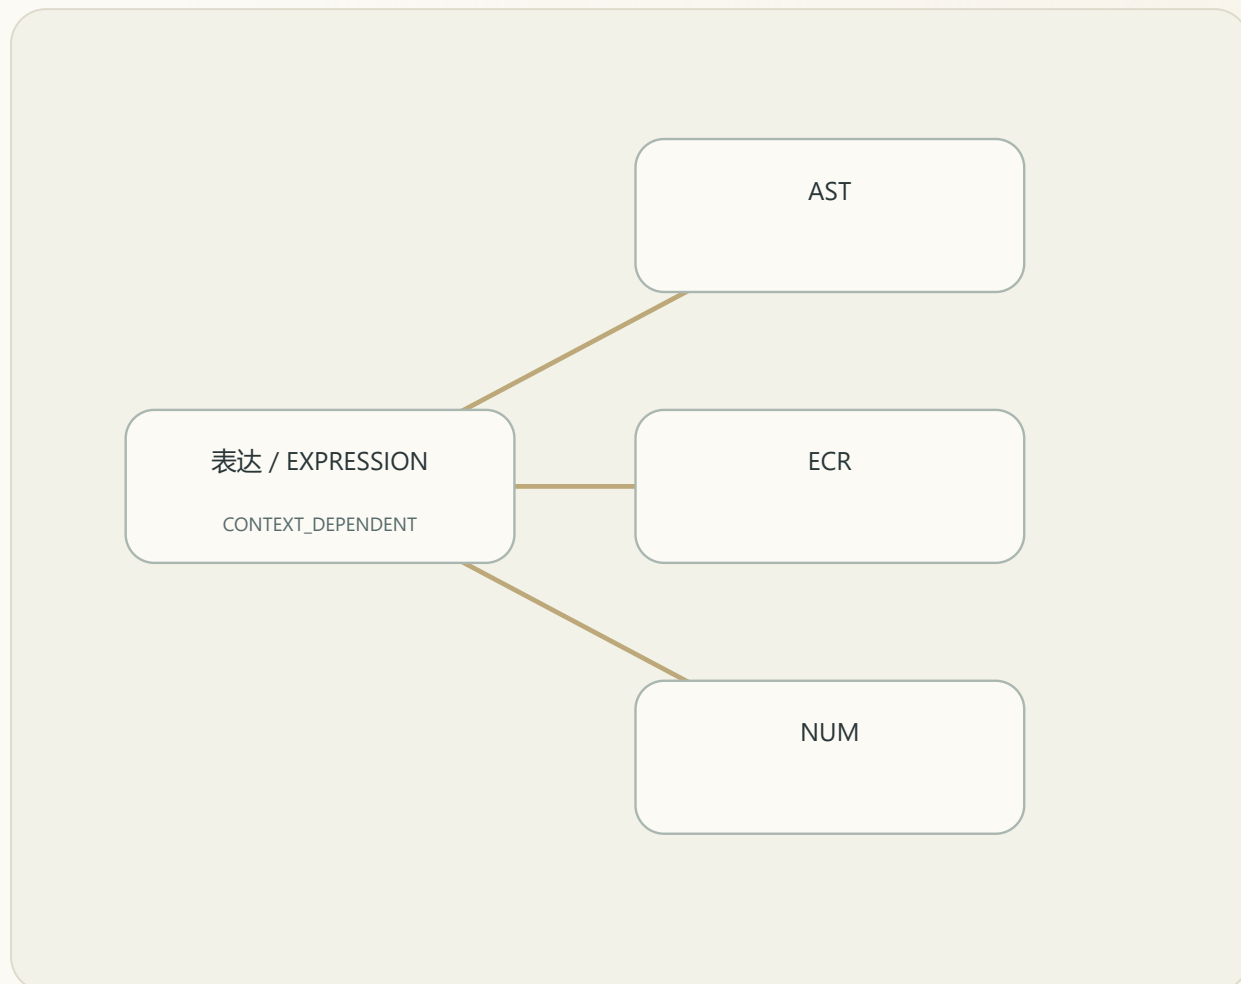

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

不同方法提供不同类型且有边界的主张，保留互补视角，不合并成单一方法结论。 / Customer-publishable claims from BZR, ECR contribute different bounded claim types to the Environment dimension. They are retained as complementary perspectives rather than merged into one method conclusion.

表达 / EXPRESSION

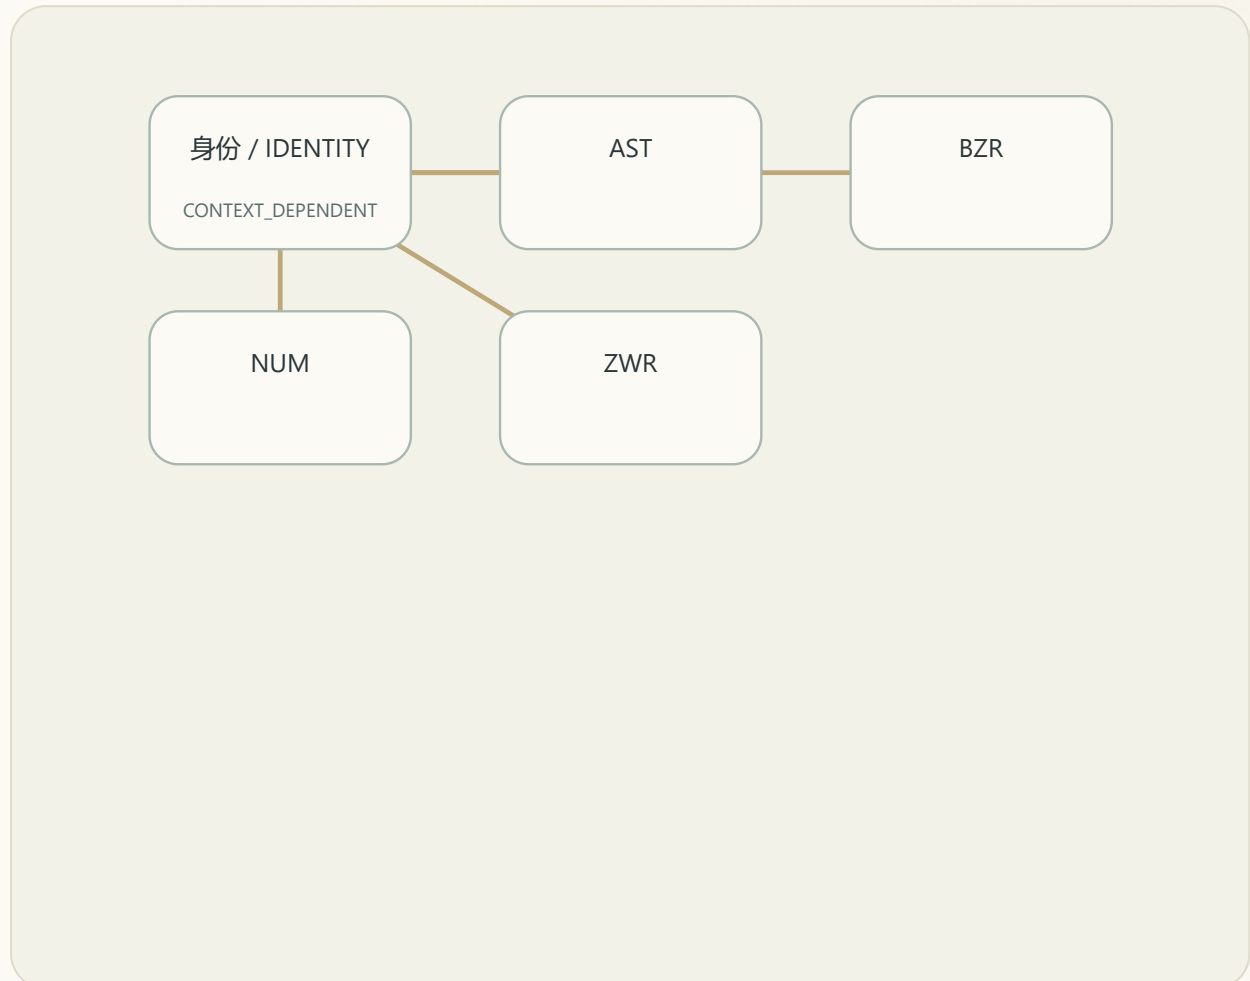

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

这个维度包含明确条件或已授权时间情境，保留其依赖条件，不写成固定结论。 / The Expression dimension includes an explicit condition or authorised timing context across customer-publishable method claims. The cross reading preserves that dependency instead of turning it into a fixed conclusion.

身份 / IDENTITY

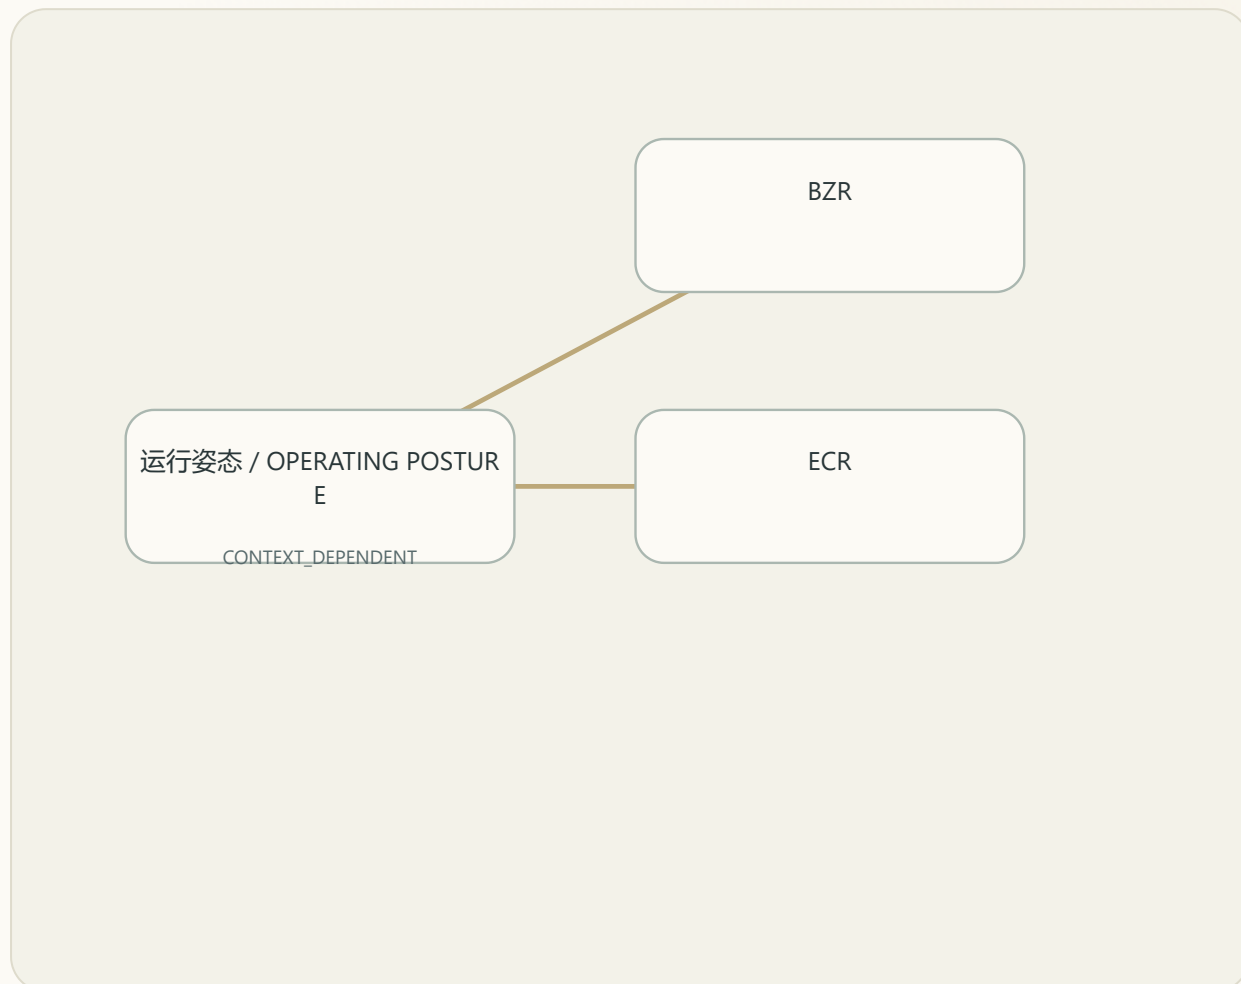

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

这个维度包含明确条件或已授权时间情境，保留其依赖条件，不写成固定结论。 / The Identity dimension includes an explicit condition or authorised timing context across customer-publishable method claims. The cross reading preserves that dependency instead of turning it into a fixed conclusion.

运行姿态 / OPERATING POSTURE

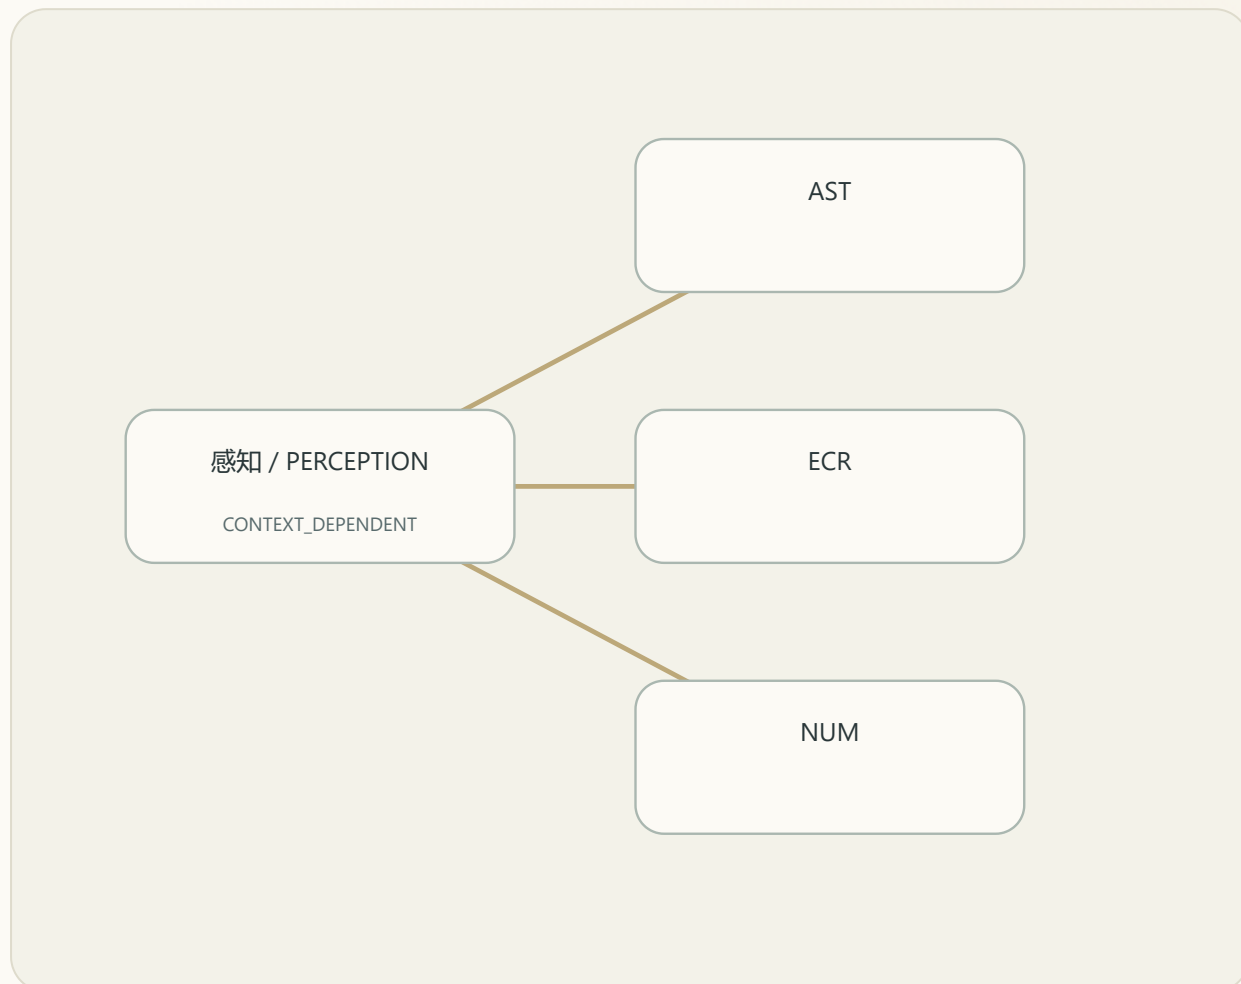

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

这个维度包含明确条件或已授权时间情境，保留其依赖条件，不写成固定结论。 / The Operating posture dimension includes an explicit condition or authorised timing context across customer-publishable method claims. The cross reading preserves that dependency instead of turning it into a fixed conclusion.

感知 / PERCEPTION

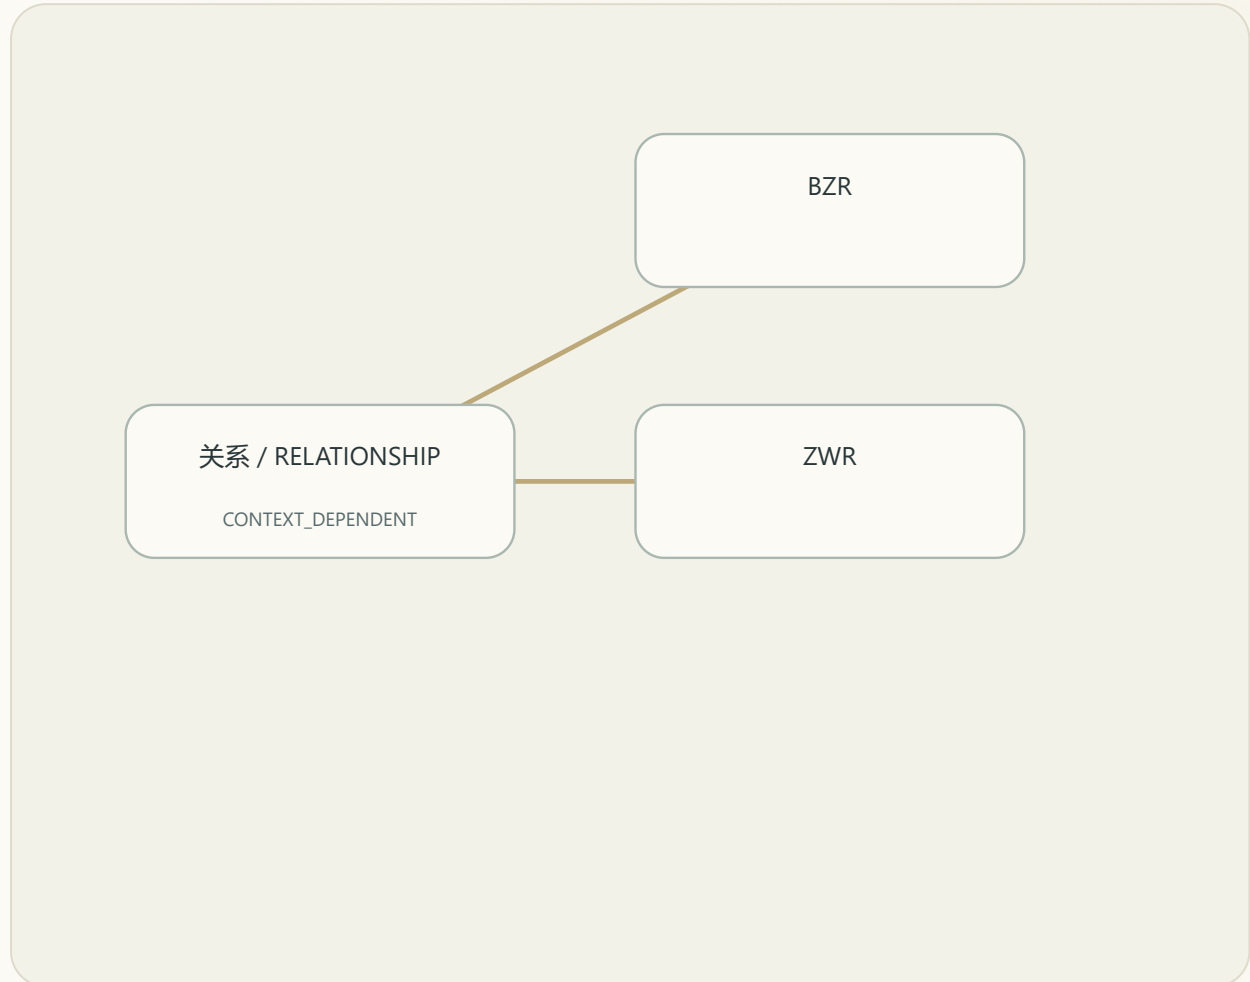

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

这个维度包含明确条件或已授权时间情境，保留其依赖条件，不写成固定结论。 / The Perception dimension includes an explicit condition or authorised timing context across customer-publishable method claims. The cross reading preserves that dependency instead of turning it into a fixed conclusion.

关系 / RELATIONSHIP

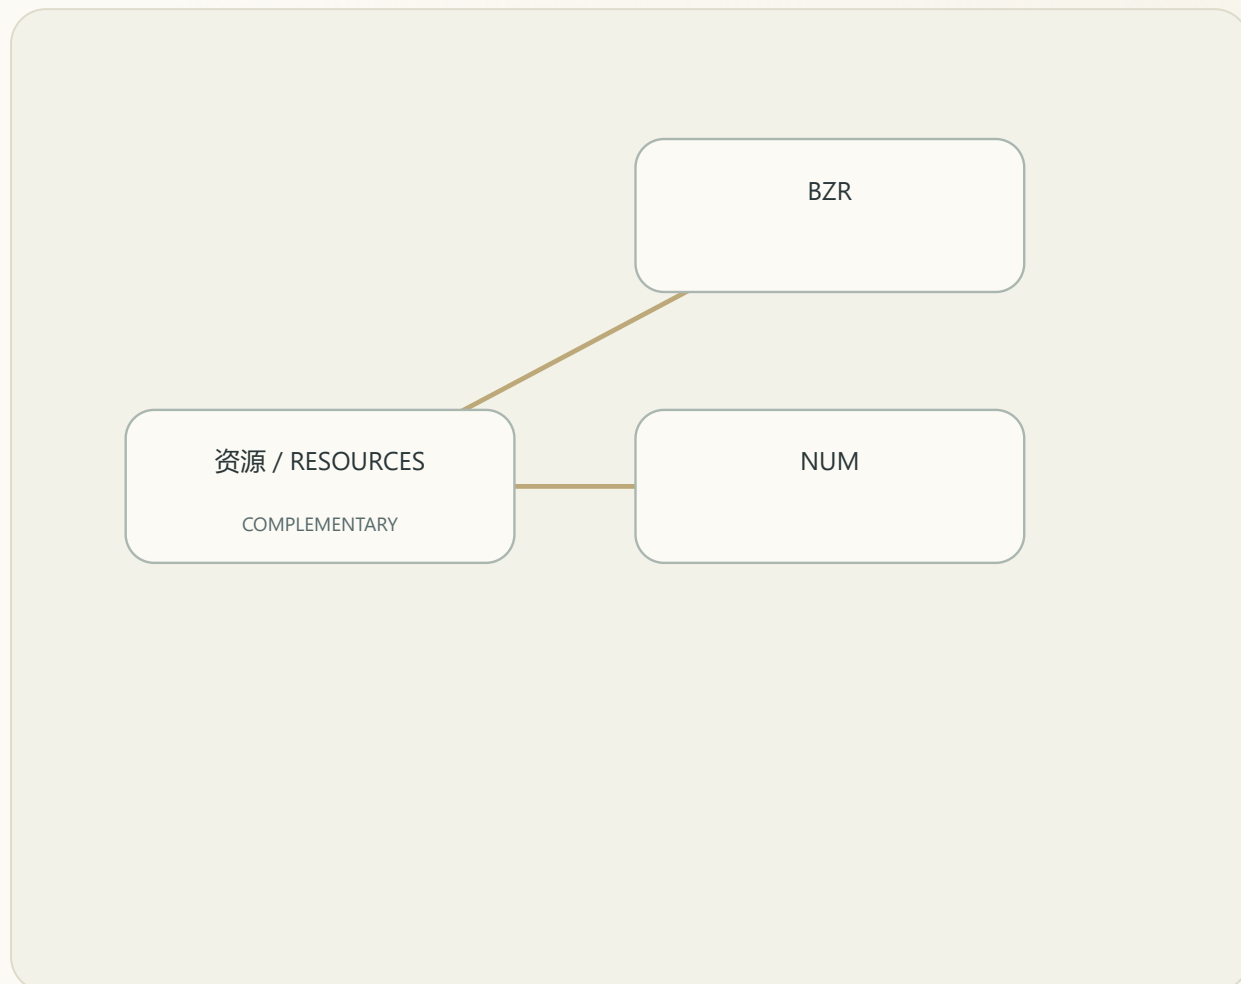

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

这个维度包含明确条件或已授权时间情境，保留其依赖条件，不写成固定结论。 / The Relationship dimension includes an explicit condition or authorised timing context across customer-publishable method claims. The cross reading preserves that dependency instead of turning it into a fixed conclusion.

资源 / RESOURCES

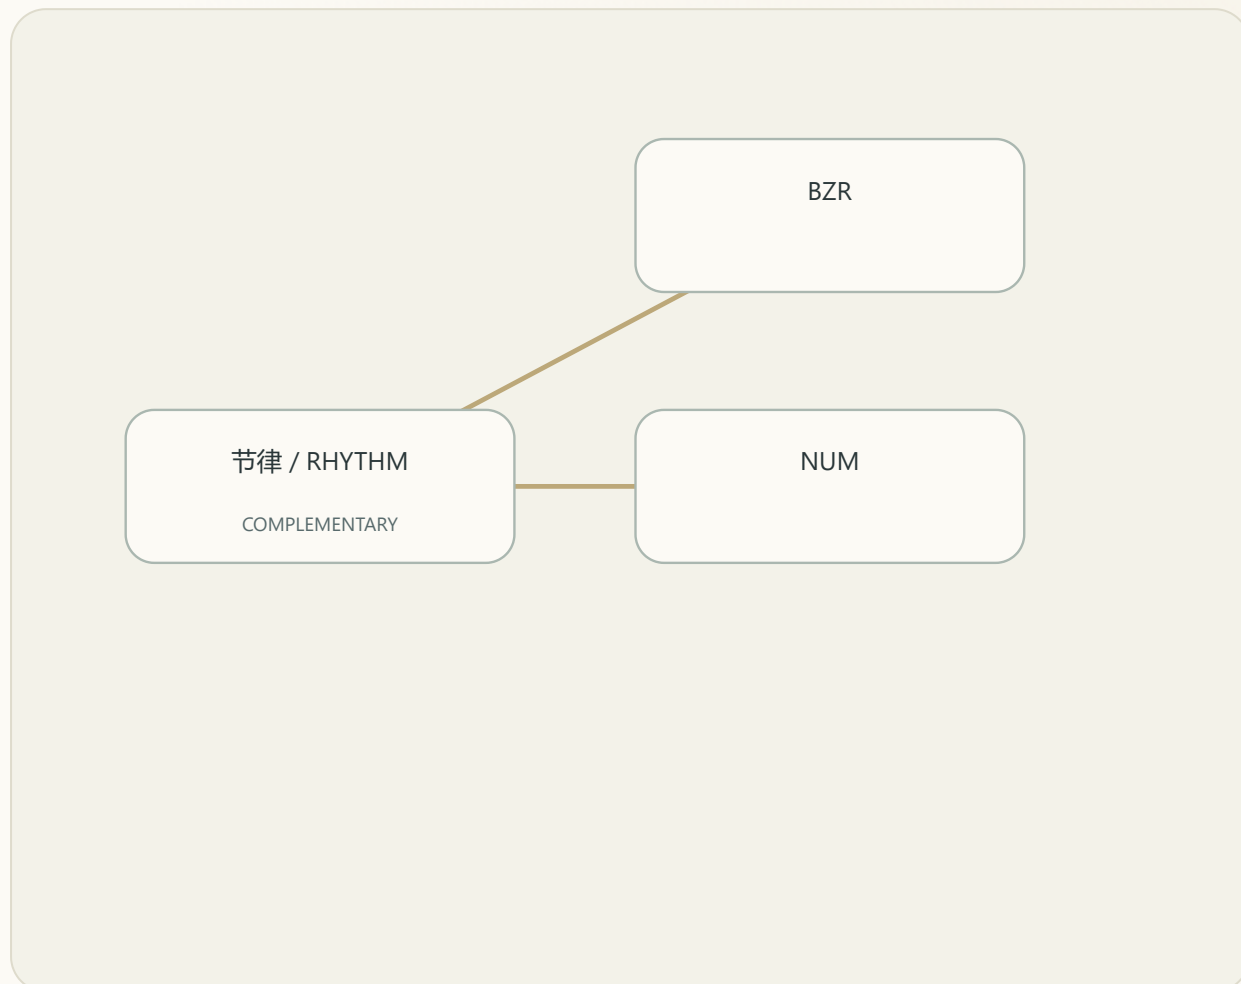

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

不同方法提供不同类型且有边界的主张，保留互补视角，不合并成单一方法结论。 / Customer-publishable claims from BZR, NUM contribute different bounded claim types to the Resources dimension. They are retained as complementary perspectives rather than merged into one method conclusion.

节律 / RHYTHM

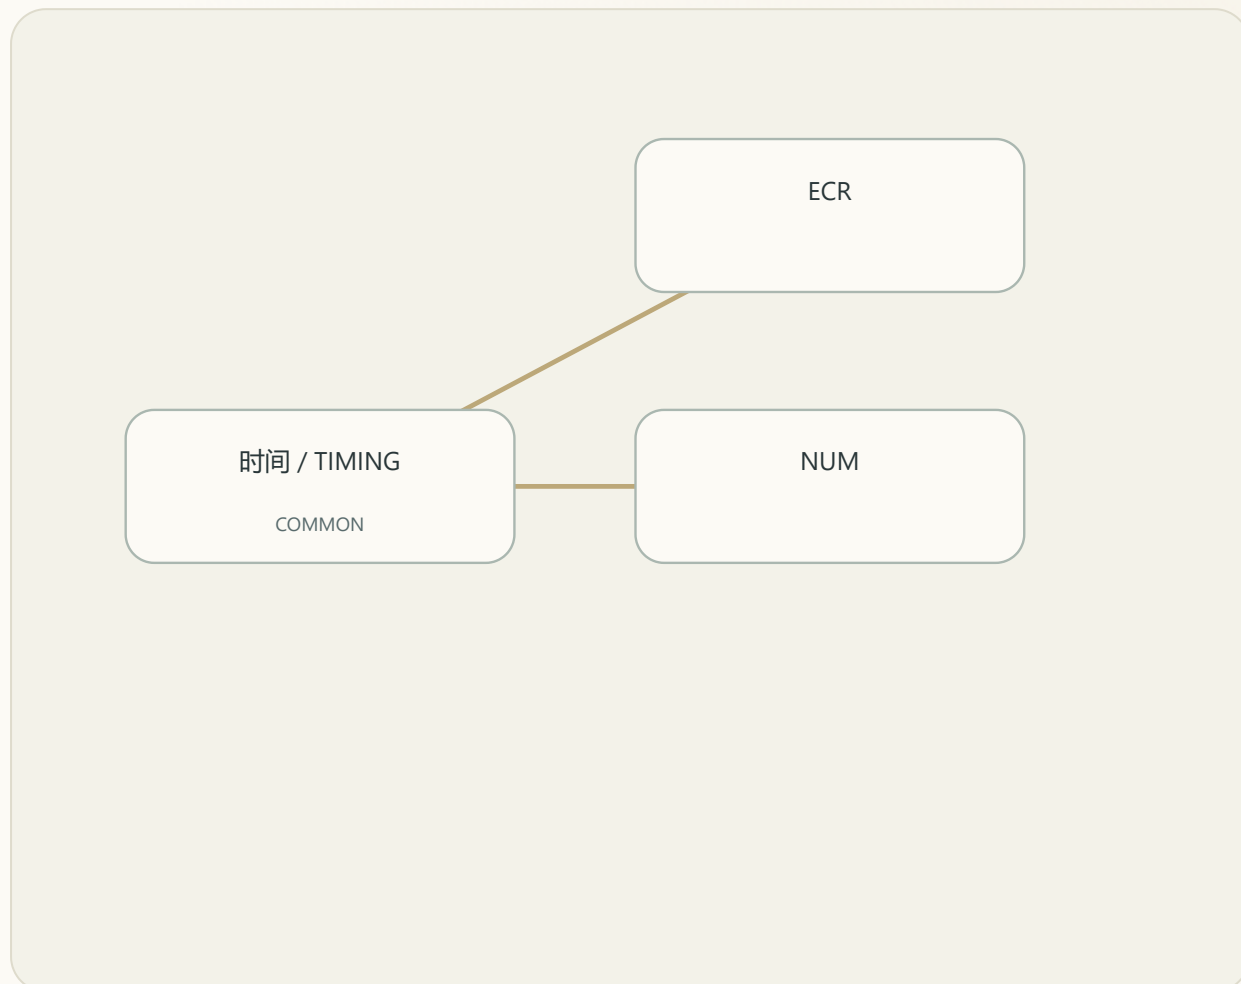

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

不同方法提供不同类型且有边界的主张，保留互补视角，不合并成单一方法结论。 / Customer-publishable claims from BZR, NUM contribute different bounded claim types to the Rhythm dimension. They are retained as complementary perspectives rather than merged into one method conclusion.

时间 / TIMING

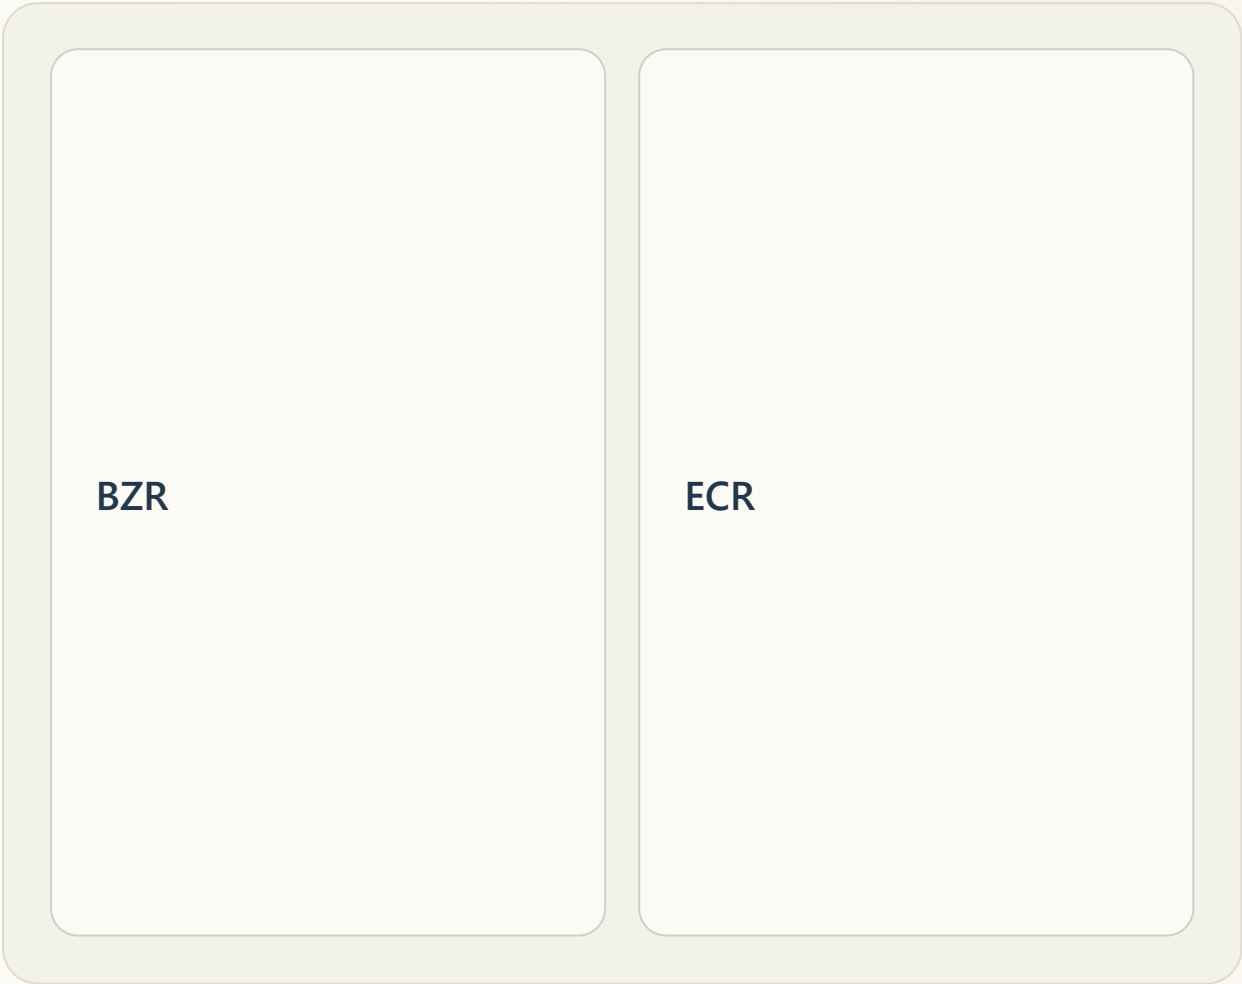

这些有边界的方法主张如何并置？ / How do these bounded contributions relate?

多个方法分别强调这个维度。共同强调不构成事实，也不提高真实性置信度。 / 3
customer-publishable method claims from ECR, NUM independently contribute to the Timing dimension. This records shared emphasis only; it does not establish a fact or increase truth confidence.

来源证据 · 互补视角 / Source evidence · COMPLEMENTARY

方向的来源实际说了什么？ / What do the sources actually say about direction?

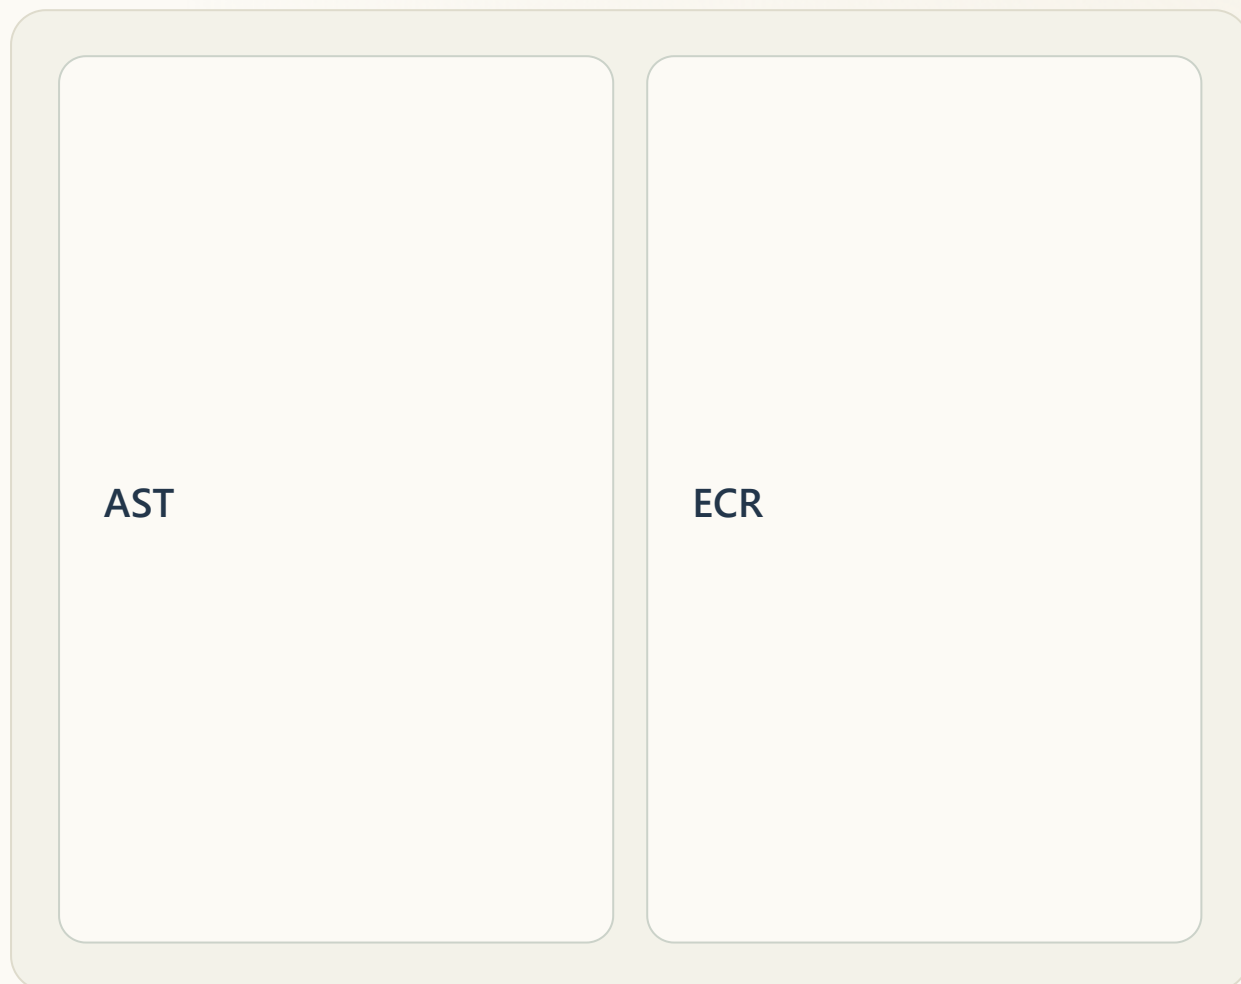

这一主题来自时柱的柱位角色、天干戊、地支戊，以及它与日主癸在月令戊之下的关系，不是由单一干支直接推断。 / This theme comes from the role of the Hour Pillar, its stem Yang Earth, its branch Yang Earth, and its relationship to the day reference Yin Water under the month context Yang Earth.

十二种驱动始终存在。出生坐标基线按照 ECR 太阳锚点扇区距离规则，把 D3 排在首位；这不是对当前现实驱动优先级的判定。 / All twelve driver identities remain present. The birth-coordinate baseline ranks D3 first by the ECR solar-anchor sector-distance rule; this is not a claim about the current Reality driver priority.

来源证据 · 依赖情境 / Source evidence · CONTEXT_DEPENDENT

表达的来源实际说了什么？ / What do the sources actually say about expression?

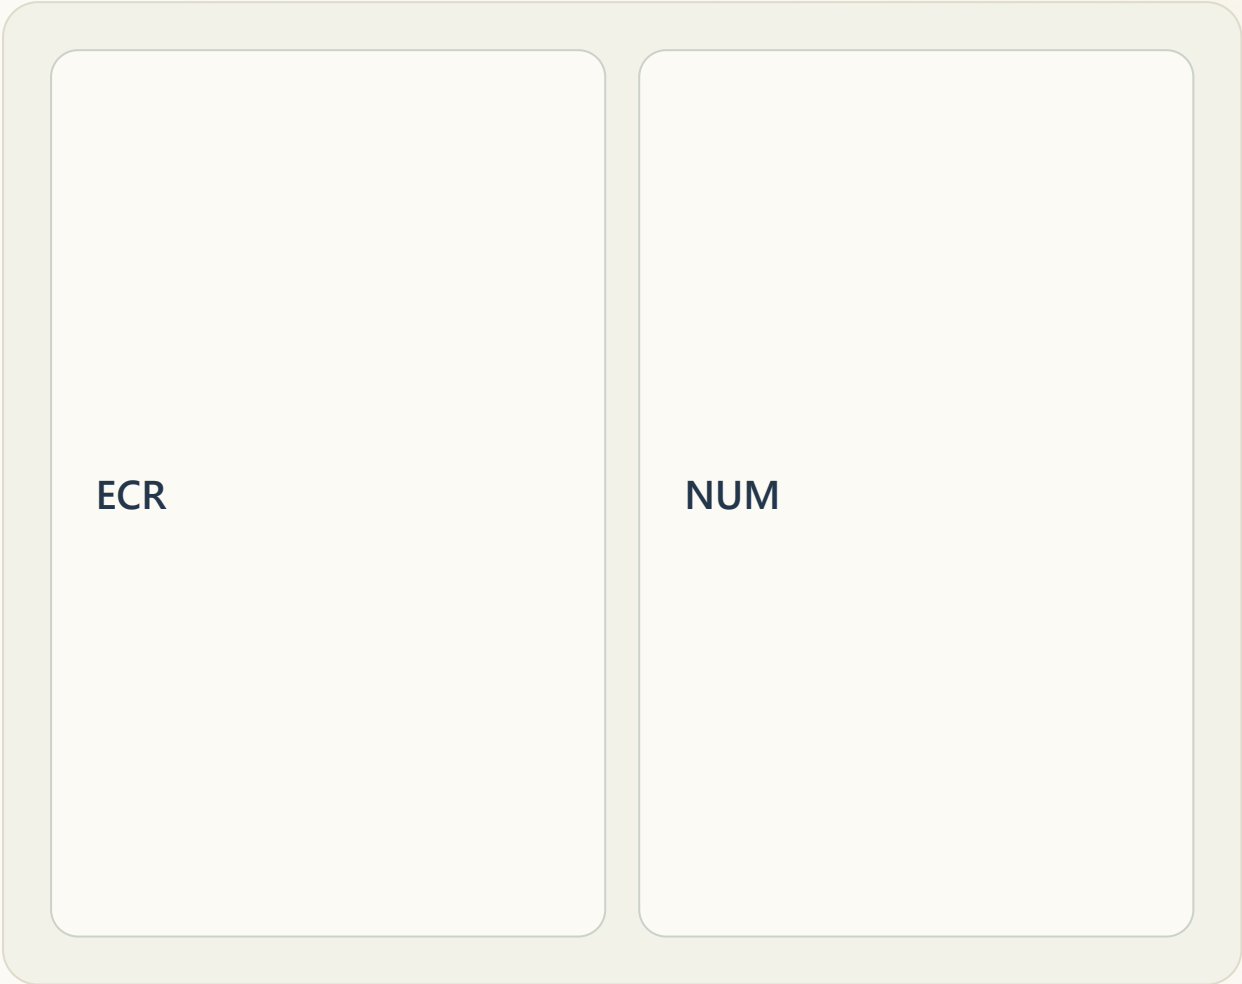

这一主题来自太阳落在第 12 宫与水星的共同关系，并严格采用普拉西德宫制，不是从单一符号直接推断。 / This theme comes from Sun in House 12 read together with Mercury, using Placidus, rather than from one symbol alone.

这一主题把长期方向背景 CC03、现实语法 G4 与配对的基础问题 Q4 放在同一条运行坐标中阅读，不把任何一层当成人格标签。 / This theme combines the recorded long-range context CC03, Reality Grammar G4, and its paired baseline question Q4; none of the three is treated as a personality label.

来源证据 · 共同强调 / Source evidence · COMMON

时间的来源实际说了什么？ / What do the sources actually say about timing?

在配置 ECR-H14 内，太阳锚点位于激活阶段 A6。激活描述运行窗口中的位置，不代表吉凶、成功程度或必然事件。 / Within configuration ECR-H14, the solar anchor occupies activation stage A6. Activation describes position within the runtime window, not luck, success or a fixed outcome.

这一主题来自“birth year number”这一计算角色及其实际推导路径 21 → 3，不是只看最终数字的独立标签。 / This theme comes from the Birth Year Number role and its recorded path 21 → 3; it is not a free-standing meaning for the final digit.

尚未形成综合的部分 / What remains uncomposed

哪些维度仍须分开保留？ / Which dimensions remain separate?
