一份关于财务，也关于生活的报告

A Financial Report Grounded in Everyday Life

现金流、资源、风险与行动，需要放回生活与责任的脉络中阅读。
Cash flow, resources, risk, and action become more meaningful when read in the context of everyday life and responsibility.

> 一个人的财务状况，并不会由账户余额、资产总额或某个月的结余独立决定。收入在不同时间进入生活，日常开销与家庭责任不断占用可用资金，借款、储蓄和投资则各有自己的期限与限制，有些资产在账面上具有价值，却未必能在需要时立即动用；有些支出发生在未来，却已经影响今天可以作出的安排。只有把这些情况放在同一个时间和责任背景中阅读，财务数字才开始具有可以理解的意义。
>
> A financial position is never fully described by a bank balance, the value of one's assets, or the surplus recorded in a single month. Income arrives at different times; living costs and household responsibilities draw on funds as they become due; borrowing, savings, and investments are shaped by their own terms and restrictions. Some assets have substantial recorded value without being readily available as cash. Some future commitments already influence what can reasonably be set aside today. Financial information becomes more useful when it is read together, with its timing, ownership, and obligations intact.

04 如何理解这些数字 HOW TO READ THESE FIGURES

结合背景信息，才能更准确地理解数字的含义
CONSIDER THE CONTEXT TO BETTER UNDERSTAND WHAT THE FIGURES MEAN

01 报告日期与资料截止点很重要

03 零不等同于未知
ZERO IS NOT THE SAME AS UNKNOWN
“0”表示在已提供的资料中该项目的金额为零；而“缺失”表示目前没有相关资料。
A "0" means the amount is zero based on the provided information; "missing" means relevant information is not available.

04 估算与情景不等同于已确认结果
ESTIMATES AND SCENARIOS ARE NOT CONFIRMED RESULTS
估算值和情景分析用于帮助理解可能性，不应与已确认的实际数据混淆。
Estimates and scenarios are for illustrative purposes and should not be confused with confirmed actual figures.

05 为什么边界很重要 WHY BOUNDARIES MATTER

财务报告的价值，不在于假装每一个数字都确定无误，而在于清楚地展示：哪些是已知的，哪些是基于合理推断的，以及哪些仍需进一步确认。
A financial report becomes more useful not by pretending that every figure is certain, but by clearly showing what is known, what is inferred, and what still needs confirmation.

PHI OS 财务视角
PHI OS FINANCIAL LENS

从现金流到选择：财务的四个观察方向
From Cash Flow to Choice: Four Ways of Reading a Financial Life

财务并不只是看一个数字够不够，而是看钱如何进入生活、如何流出、哪些资源能够支撑当下与未来、哪些限制正在形成，以及下一步应当先处理什么。PHI OS 的财务视角把这些关系放回同一张图中，让阅读不只停留在余额、总资产或单个月结余，而是看见生活、责任、时间与选择如何共同构成一个人的财务现实。

Finance is not understood through a single number. It becomes clearer when we see how money enters life, how it leaves, which resources support the present and the future, which constraints are emerging, and what should be addressed first. The PHI OS financial lens places these relationships back into one view, so that reading moves beyond a balance, a total asset figure, or a single monthly surplus, and begins to show how life, responsibility, time, and choice together form a financial reality.

01 现金流 CASH FLOW

看收入、支出、偿债与结余之间如何彼此影响。它不是只记录钱进钱出，更帮助理解生活安排如何持续，哪些地方正在消耗余裕，哪些变化会立刻影响可用空间。

Observe how income, expenses, debt service, and surplus affect one another. It is not only a record of money in and money out, but a way to understand how life is being sustained, where flexibility is being consumed, and which changes would immediately alter available room.

02 资源 RESOURCES

看资产、储蓄、投资、保障与家庭支持系统如何形成可动用与不可动用的资源结构。重点不只在总额，而在于结构、流动性、期限与配置。

See how assets, savings, investments, protection, and household support create a structure of usable and less-usable resources. The focus is not only on total value, but on structure, liquidity, timing, and allocation.

03 风险 RISK

看负债、流动性不足、保障缺口与未来不确定性如何构成限制。风险不是为了制造焦虑，而是为了更早辨认压力来自哪里，以及哪些脆弱点需要先补强。

Identify how liabilities, limited liquidity, protection gaps, and future uncertainty create constraints. Risk is not used to create fear, but to recognize earlier where pressure is coming from and which vulnerabilities need to be strengthened first.

04 行动 ACTION

看洞察如何转成排序、选择与执行。行动不是一次做完所有事情，而是依据当前现实与目标，先处理最关键的一步，再逐步推进后续安排。

Turn insight into sequence, choice, and execution. Action does not mean doing everything at once; it means responding to current reality and future aims by taking the most important next step first, and then progressing in order.

例如 FOR EXAMPLE

例如，贷款提前还本可能降低长期利息，却会占用当前现金与储备；增加储蓄能强化缓冲，却可能延后短期消费与其他目标。财务判断之所以困难，往往不是因为数字本身，而是因为不同方向同时牵动彼此。

For example, early loan repayment may reduce long-term interest while drawing on present cash and reserves; increasing savings may strengthen resilience while delaying short-term spending or other goals. Financial judgment is often difficult not because numbers are unclear, but because different directions affect one another at the same time.

本报告的计算结果与说明，建立在特定时间、特定资料版本和明确计算条件之上。收入、支出、资产与负债之间的关系，只有在币种、期间、所有权及资金用途得到适当区分后，才具有可以比较的意义。部分结果来自客户已经确认的资料，部分由系统按照既定方法计算，也有一些属于估算或客户设定的情景。不同类型的结果并不具有完全相同的确定程度，因此，阅读本报告时，不仅需要理解数字本身，也需要理解这些数字能够说明什么，以及尚不能据此判断什么。

The calculations and explanations in this report are grounded in a defined reporting date, a specific version of the information provided, and stated calculation conditions. Relationships between income, spending, assets and liabilities become meaningful only when currency, timing, ownership and intended use have been properly distinguished. Some results draw on information confirmed by the client; others are calculated using established methods, while certain figures remain estimates or illustrate explicitly selected scenarios. These results do not all carry the same degree of certainty. Reading the report therefore requires an understanding not only of the figures themselves, but also of what they can establish and what remains beyond their scope.

支出以来源基年金额和已声明通胀逐年计算；这不是现值本金。资金情景使用已声明回报与费率形成净增长，供款依已存周期于期末加入，费用年末扣除；未筹不自动举债。受限资金此前增长与释放单列，见指定资产调节页。

Spending applies declared inflation to source-year costs; it is not present-value capital. Funding uses declared return and fee rates for net growth, saved period-end contributions and year-end needs. Unfunded needs are never implicitly borrowed. Prior restricted growth and releases are listed in reconciliation pages.
