PHIOS REALITY NAVIGATION

WHAT IS BAZI?

A system for understanding life structure through time.

Bazi, also called the Four Pillars, is a traditional system that uses the year, month, day, and hour of birth to read the energetic structure of a life. Through the combination of Heavenly Stems and Earthly Branches, it offers a structured lens for understanding natural tendencies, strengths, timing, and direction.

Bazi is not fatalism. It is a way to ask clearer questions:

- Who am I?
- How do I operate in different environments and periods of time?
- Where are my natural strengths and development paths?
- How can I work with change more wisely?

Bazi does not tell you what must happen.
It helps you understand yourself,
so you can choose with greater clarity.

FUTURE

WHY HAS BAZI ENDURED THROUGH TIME?

A life-observation system carried across centuries.

Bazi traces back to classical Chinese astronomy, calendrical systems, yin-yang thought, and the Five Elements. By observing the relationship between seasonal cycles, celestial patterns, and human life, earlier thinkers developed a time-based framework for understanding life structure.

EARLY FOUNDATIONS

The ideas of yin-yang and the Five Elements gradually formed the early understanding of life and cosmos.

HAN DYNASTY

Calendrical systems and stem-branch structures became more established, laying key foundations for Bazi.

TANG AND SONG

Bazi interpretation matured and became widely used for personal life reading.

MING AND QING

Schools, commentaries, and applied methods expanded, allowing the system to continue evolving.

Bazi has endured because it is more than a prediction tool. It is a deep observation of time, nature, and human life — and it still offers meaningful insight today.

HOW DOES PHI OS USE BAZI?

Traditional wisdom × modern perspective × practical application.

PHI OS respects the traditional foundations of Bazi while applying it in a modern, structured, and practical way. Our goal is not to fix your life into a label, but to help you understand your structure and use it more clearly in real life.

STRUCTURED ANALYSIS

We organize classical Bazi logic into a clearer and more systematic reading.

FOCUS ON PERSONAL GROWTH

Rather than emphasizing fate, we focus on your traits, strengths, and room for development.

CONNECTED TO REAL LIFE

We relate Bazi insight to areas such as work, relationships, family, and personal direction.

NEUTRAL AND PRACTICAL

We do not offer absolute predictions.
We provide perspective, so you can make clearer decisions.

Bazi does not define your life.
It helps you live with more understanding and possibility.

HOW TO READ THIS REPORT

A structured guide created for your reading journey.

1

UNDERSTAND THE OVERALL STRUCTURE

The report begins with your life structure and then unfolds into traits, strengths, challenges, timing, and development direction.

2

FOCUS ON THE KEY INSIGHTS

Each section highlights the most important ideas and practical takeaways.

3

READ IN RELATION TO YOUR REAL LIFE

Use the report as a structured lens and connect it with your lived experience and present situation.

4

RETURN, REVIEW, AND APPLY

This report is not the end of the conversation. Revisit it at different stages of life and discover new meaning over time.

The real value is not in knowing the future.
It is in making clearer choices through
understanding.

01

命盘总览

Chart Overview

Begin with the chart itself. The four pillars, Day Master and element inventory provide a shared reference for the chapters that follow. Read the visible structure before drawing conclusions about work, relationships or timing; each later chapter returns to a different part of this starting point.

01 · Chart Overview

Your BaZi Chart

Stems · branches · positions

Year	Month	Day	Hour
Heavenly stem	Heavenly stem	Heavenly stem	Heavenly stem
己	庚	癸	戊
JI · Yin	GENG · Yang	GUI · Yin	WU · Yang
Earth	Metal	Water	Earth
Earthly branch	Earthly branch	Earthly branch	Earthly branch
巳	午	丑	午
SI	WU	CHOU	WU
Fire	Fire	Earth	Fire
Hidden stems	Hidden stems	Hidden stems	Hidden stems
丙 · 戊 · 庚	丁 · 己	己 · 癸 · 辛	丁 · 己

The day stem is the reference point

Day Master	Month command	Pillars
癸 Water	午 Fire	4
1	0	6
Root records	Wood	Fire
		7
		Earth
		3
		Metal
		2
		Water

Read the columns from year to hour, keeping the stem, branch and hidden stems distinct. The Day Master provides a reference position; the element inventory records what is present. Counts describe this inventory, rather than measuring personal worth or deciding which life outcome must follow.

01 · Chart Overview

Key Insights

01

Start with the Day Master and month setting; keep their positions distinct before considering the wider chart.

02

Compare the element counts as an inventory, without converting a larger count into a stronger personality trait.

03

Carry one concrete question into the next chapter and return to this chart when an interpretation needs context.

02

核心性格

Core Personality

Learning, support and absorption come first in this reading.

02 · Core Personality

Personality Analysis

This is the topic's first reading priority, not a measurement of your personality.

Associated themes include peer relationships and self-position, alongside rules, responsibility and pressure. These do not replace the main emphasis.

Capability is considered through absorption, practice, expression and what can be carried repeatedly. These are co-occurring dimensions, not stages in a sequence.

The structural link between self-position and expression forms part of this topic's context, without establishing a real-life effect.

The structural tension between environment and self-position is a separate part of the context, without establishing a real-life effect.

A final strong-or-weak judgment remains open and should not be treated as a fixed identity.

Keep learning, support and absorption as the main emphasis in this reading.

02 · Core Personality

Strengths & Challenges

01

Support, expression and external demands need to be considered together, but the chart does not establish how you experience them.

Questions for this period

Which of these themes fits a concrete experience, and which does not?

What in your experience does not fit this reading?

This is a conditional symbolic reading, not a statement of observed behavior or a prediction of events.

03

人生格局

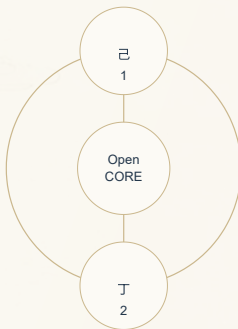

Life Structure

A chart contains conditions as well as visible patterns. This chapter brings those two sides together: what the method has established, what remains open, and how support and demand should be read together. It is a structural reference for later chapters, rather than a ranking of lives.

03 · Life Structure

Chart Structure

Primary verdict remains open

**1 · Seven Killings**

己

2 · Indirect Wealth

丁

Candidate evidence

Seven Killings

Visible stem match

Visible paths / recorded paths: 0 / 1

Indirect Wealth

No visible stem match

Visible paths / recorded paths: 2 / 3

1

Root records

0

Visible peer support

0

Visible resource support

A primary pattern is not established. A visible path is not a formation verdict. Review the candidate conditions together. No secondary pattern is assigned. Reading order is not a quality ranking. Missing factors remain explicit.

Read each candidate alongside the conditions that would establish it, keeping a visible path separate from a completed judgment.

03 · Life Structure

How Structure Shapes Life Pattern

Life operation asks whether support, output, resources, responsibility and relationships can circulate as one system.

For life operation, the leading functional group is rules, responsibility and pressure at about 46.2%, carried mainly by Seven Killings, Indirect Wealth, and Direct Officer. It also connects to Seven Killings pattern path and Wealth pattern path and is modified by relationships between pillar positions such as self anchor ↔ later expression and environment ↔ self anchor. It directly reconnects to 4 themes considered across the chart, so this is best read together with the rest of the chart.

Consider support and demand together rather than isolating one favorable symbol. A visible candidate does not become an established pattern merely because its name appears in a diagram. Where a condition remains open, keep the corresponding conclusion open too. In experience, compare a demanding situation with and without practical support. This comparison can sharpen your question about the structure without turning the chart into a verdict about what you can achieve.

The key is not which function wins permanently, but whether support, output, resources and responsibility can return to a sustainable circulation across changing periods.

04

事业发展

Career Development

Work brings responsibility, output and support into a concrete setting. This chapter reads the career theme through roles and working conditions, then asks how those conditions compare with your experience. The aim is a clearer understanding of a workable role, without assigning a guaranteed profession or outcome.

04 · Career Development

Career Outlook

Work is read here as the way output, responsibility, resources and learning are organized into a usable role.

For career and work, the leading functional group is rules, responsibility and pressure at about 46.2%, carried mainly by Seven Killings, Indirect Wealth, and Direct Officer. It also connects to Seven Killings pattern path and Wealth pattern path and is modified by relationships between pillar positions such as self anchor ↔ later expression and environment ↔ self anchor. It directly reconnects to 4 themes considered across the chart, so this is best read together with the rest of the chart.

Translate this theme into a question about a real role. What were you expected to deliver, who set the standard, and which resources were available? Compare two projects with different expectations before deciding whether the reading fits. A role title alone tells you little about these conditions. The useful distinction is between a responsibility you can carry with clear support and one whose requirements remain unclear. Record the actual difference before choosing an adjustment.

Career structure can change with role, organization and timing. This describes work dynamics rather than fixing one profession into a guaranteed success-or-failure outcome.

04 · Career Development

Work Patterns & Considerations

01

Compare possible work settings by their actual tasks, decision boundaries and available support, rather than a promising job title.

02

Choose a recent successful delivery and identify what made its responsibilities and expectations clear enough to carry.

03

Before changing a working pattern, describe one small reversible experiment and the observation that would make you reconsider it.

05

财富运势

Wealth Outlook

Resources move through production, exchange and responsibility. This chapter keeps those relationships visible while separating symbolic wealth language from actual financial outcomes. Use it to ask clearer questions about a situation you already know, with real records and obligations providing the context for any practical decision.

05 · Wealth Outlook

Wealth Analysis

Wealth is read as the chart's resource flow: what can be produced, managed, exchanged and protected.

For wealth and resources, the leading functional group is resources and exchange at about 23.1%, carried mainly by Seven Killings, Indirect Wealth, and Direct Officer. It also connects to Wealth pattern path and is modified by relationships between pillar positions such as self anchor ↔ later expression and environment ↔ self anchor. It directly reconnects to 2 themes considered across the chart, so this is best read together with the rest of the chart.

Follow the resource through one concrete exchange: what was contributed, what was returned, and what had to be maintained afterward? This helps keep the symbolic reading connected to an observable process. Do not treat a wealth label as evidence of a windfall or as a reason to take a financial position. If the actual record differs from the theme, retain that difference. It may show that the current circumstances matter more than this part of the interpretation.

Resource structure describes how money, opportunity and exchange enter the chart; it is not an income promise. Real outcomes still depend on choices, markets, responsibilities and timing.

05 · Wealth Outlook

Resources & Reality Checks

01

Describe a resource exchange using actual contributions and obligations, keeping the chart interpretation in a separate note.

02

Check whether a perceived opportunity rests on verifiable circumstances or only on an attractive interpretation of a symbol.

03

Leave age bands and windfall claims open when the admitted timing evidence does not support those specific conclusions.

06

感情婚姻

Relationships & Marriage

Relationships take shape between people, not inside a single chart label. This chapter uses the method reading to explore recurring positions, expectations and support. Compare its themes with specific interactions while preserving the other person's perspective and the possibility that the same pattern changes in a different setting.

06 · Relationships & Marriage

Relationship Patterns

Relationships are read through recurring relationships between pillar positions between self-position, rules, resources and support, not through a single spouse label.

For relationships, the leading functional group is rules, responsibility and pressure at about 46.2%, carried mainly by Seven Killings, Indirect Wealth, and Direct Officer. It also connects to Seven Killings pattern path and Wealth pattern path and is modified by relationships between pillar positions such as self anchor ↔ later expression and environment ↔ self anchor. It directly reconnects to 3 themes considered across the chart, so this is best read together with the rest of the chart.

Choose an interaction you can describe without guessing the other person's motives. Who asked for what, what was understood, and how was support offered or withheld? Compare a second interaction where the outcome differed. This can help distinguish an expectation from an observation. Use the reading as a prompt for that comparison, rather than proof of an ideal partner, a marriage date or a fixed relationship outcome. The other person's account remains an independent source of understanding.

Relationship structure is best used to observe interaction style, boundaries and recurring relationships between pillar positions rather than to predict marriage, separation or one fixed partner outcome.

06 · Relationships & Marriage

Relationship Advice

01

Separate what was said from what you inferred, then compare your account with the other person's account when appropriate.

02

Look for an interaction that changed when expectations became clearer; describe the change without assigning a permanent partner label.

03

Ask which forms of support work for both people, leaving marriage timing unresolved unless specific evidence has been admitted.

07

身心状态与日常节奏

Wellbeing & Daily Rhythm

Wellbeing is approached here through lived rhythm and observed pressure. The available chart reading does not establish medical conditions, vulnerable organs or treatment needs. This chapter therefore offers a space to describe daily demands and support, keeping those observations distinct from any clinical assessment or health decision.

Pressure & Daily Rhythm

This report does not make health predictions. The pressure theme can only supply a question about experience: which demands felt manageable, and what support was present at the time? Describe your own observations without assigning a medical cause to a chart symbol. A useful record distinguishes the situation, your response and what changed afterward. It can remain meaningful even if the chart theme does not fit. Health decisions require evidence appropriate to health, beyond the scope of this report.

Keep a distinction between a busy schedule, your own description of strain, and any explanation proposed for it. Neither an element count nor a pressure symbol can establish a bodily cause. If you revisit this chapter later, compare the circumstances you recorded, rather than looking for a predicted condition to confirm. Your experience may change while the birth chart remains the same.

07 · Wellbeing & Daily Rhythm

Wellbeing Reflections

01

Record the context of a demanding day and the support you actually had, without translating elements into organ or disease labels.

02

Compare your own account of daily rhythm across different settings, leaving causes open when the record cannot establish them.

03

Keep any health assessment separate from the symbolic reading; use this page only for describing your experience and questions.

08

时间结构

Timing & Cycles

The observation window is anchored to the saved generation time and customer timezone. This chapter places the supported luck cycle and year layer beside the birth structure. Time supplies a frame for comparison; your lived observations determine whether a theme is relevant to the period you are reviewing.

08 · Timing & Cycles

Current Timing

Observation time

2026-09-21

11:22:57 · Asia/Kuala_Lumpur

Luck cycle

甲戌

Year pillar

丙午

This reading is anchored to 2026-09-21 in Asia/Kuala_Lumpur. The birth chart remains the baseline; the time layers below show the selected observation window.

Keep the birth chart, luck cycle and year layer distinct as you compare them. They describe different levels of the method and should not replace one another. Use the saved observation date to identify which period you are examining, then record what actually occurred within that period.

Questions for this period

Which responsibility became more noticeable during this observation window, and what concrete example supports your account?

What changed in the support available to you, and did your response change when that support changed?

A time layer helps frame a comparison; it does not establish that an event has happened or will happen.

08 · Timing & Cycles

Current-Year Insights

Observation time

2026-09-21

11:22:57 · Asia/Kuala_Lumpur

Luck cycle

甲戌

Year pillar

丙午

At the selected observation time, the year pillar is 丙午, alongside the 甲戌 luck cycle. Compare this time window with the birth structure before relating it to your experience. These are different layers, not interchangeable descriptions of you.

Questions for this period

Which experience contradicts the first theme you noticed, and what context helps explain that difference?

What stayed consistent across the year boundary, despite the change in the named time layer?

The year layer frames observation; this reading does not identify specific events as opportunities or warnings.

09

人生建议

Guidance & Recommendations

The earlier chapters offer different views of one reading. Bring them together by choosing a real situation that involves work, resources and relationships, rather than by adding every theme into a single verdict. This chapter turns that comparison into a small cycle of observation, action and review.

09 · Guidance & Recommendations

Integrated Guidance

Choose one situation where a work responsibility, a resource exchange and a relationship expectation meet. Ask which part of each chapter helps you describe that situation more precisely. Keep only the interpretations supported by your experience, including examples that challenge them. Then choose a small reversible adjustment and decide what you will observe before judging its value. Integration means making the connections useful in context; it does not require every theme to fit at once.

01

Work is read here as the way output, responsibility, resources and learning are organized into a usable role.

02

Wealth is read as the chart's resource flow: what can be produced, managed, exchanged and protected.

03

Relationships are read through recurring relationships between pillar positions between self-position, rules, resources and support, not through a single spouse label.

09 · Guidance & Recommendations

Next Steps

01

Reflect on one concrete situation and identify the difference between a chart theme and an observation you can describe.

02

Try one small reversible change to the situation, noting what you expect to observe before you act.

03

Review both supporting and contradictory examples, then adjust your question rather than forcing the experience to fit.

10

方法与附录

Method & Appendix

This chapter explains how to use the reading without giving it more authority than its evidence supports.

Return here when a term, an unresolved condition or a time layer needs clarification. The method, its interpretation and your lived experience each have a distinct role in understanding the report.

10 · Method & Appendix

How to Read This Report

Start with the visible chart and distinguish it from the prose that interprets it. A recorded symbol or count is a method fact; the meaning attached to it depends on conditions and scope. When a verdict is unresolved, do not fill the gap with a more certain story. Compare a reading with specific experience and preserve disagreement as well as agreement. The report can help organize a question, but it cannot replace independent evidence about another person, a financial outcome or a health condition. Revisit a chapter when you have a concrete example that makes the question clearer.

10 · Method & Appendix

Methodology

BaZi organizes a birth reading around four pillars and uses the Day Master as a reference position. The diagrams in this report preserve the distinctions between visible stems, branches, hidden stems and element counts. Structural candidates are shown with their conditions, so an open pattern remains open rather than becoming a final verdict. The timing chapter adds only the layers resolved by the existing method engine for the saved observation window. These layers accompany the birth structure; they do not replace it. Read the prose as a bounded explanation of that structure, then compare it with independent experience.
